

Godwin Chukwuebuka Igwegbe

Backend Developer & Devop Engineer

Results-driven Backend & DevOps Engineer with specialized expertise in ASP.NET Core, C#, Nest JS, Node JS, scalable microservices architecture, containerization, CI/CD automation, and application observability. Proven track record of building secure, high-performance web applications with clean architecture principles while implementing Docker-based deployments, GitHub Actions pipelines, and monitoring solutions using Prometheus, Grafana, and Seq.

Work History

Independent Backend Developer and Devop Engineer | Remote (Lagos, Nigeria)
July 2024 – Present

Key Project: MooreHotelAndSuites (ASP.NET Core) Architected and developed a comprehensive hotel management system using the .NET ecosystem.

- ASP.NET Core Architecture: Built modular web applications using Controllers, Services, and Dependency Injection, ensuring separation of concerns and maintainability.
- Security & Authentication: Implemented JWT-based authentication with Access and Refresh Tokens to secure API endpoints. Created custom Authorization Policies and Middleware for role-based access control.
- Database Management: Designed and optimized PostgreSQL schemas using Entity Framework Core. Handled complex relationships, indexing strategies, and query optimization for high-performance data retrieval.

Third-Party Integrations:

- Integrated Cloudinary for secure image and file management.
- Implemented SMTP services for transactional email notifications (order confirmations, booking alerts).

- API Development: Developed robust RESTful APIs with proper versioning, error handling, and response standardization.
- Cloud Deployment: Deployed the application to cloud platforms, configuring environment variables and managing production databases.
- Backend Development (Node.js/NestJS) Developed scalable backend solutions and APIs using the JavaScript ecosystem.
- NestJS Framework: Built modular backend solutions using NestJS (Controllers, Services, Guards) and Dependency Injection.
- Authentication: Implemented JWT Strategy with Passport for both REST and GraphQL APIs. Created custom Auth Guards and middleware-based authentication.
- Database: Managed PostgreSQL with TypeORM and MongoDB for schema-flexible designs.
- Validation: Enforced strict data validation using DTOs with class-validator and class-transformer.
- API Development: Designed GraphQL queries, mutations, and resolvers for type-safe data retrieval.
- DevOps & Observability:
- Implemented Docker containerization and Docker Compose orchestration for backend services and infrastructure components including PostgreSQL, Redis, Prometheus, Grafana, and Seq.
-
- CI/CD Automation:
- Configured GitHub Actions CI/CD pipelines for automated build, testing, and Docker image generation workflows using Ubuntu runners.
-
- Monitoring & Logging:
- Integrated Prometheus metrics collection, Grafana dashboards, and Seq centralized logging for API observability, monitoring, and diagnostics.
-
- Infrastructure Management:
- Managed environment-based configurations using .env variables and container networking for scalable local and cloud-ready deployments.

Backend + Devops Engineering	Database	Tools & Cloud
ASP.NET Core ** (Primary)	PostgreSQL	Git / GitHub
C#	MongoDB	Cloudinary
Node.js / NestJS	Entity Framework Core	SMTP / Email Service
RESTful APIs	TypeORM	Postman
GraphQL APIs		Swagger
JWT Authentication		Render / Cloud Platforms
Dependency Injection		Visual Studio Code
Grafana		

Prometheus		
Seq Logging		
Redis		
Docker		
Docker Compose		
GitHub Actions CI/CD		
Containerized Infrastructure		
Monitoring and Metrics		
Cloud Deployment		

Education

2023-01

Backend Development

My development journey began with Node.js, where I established a strong foundation in backend logic. I then advanced to NestJS for modular architecture before capitalizing on ASP.NET Core, where I am now highly efficient. This progression has enabled me to build robust, scalable solutions with a focus on performance, security, and clean architecture.

2022-10 (Graduated)

Bachelor of Engineering: Civil

Engineering Chukwuemeka Odumegwu

Ojukwu University-Uli. Anambra State.
